

## How to create a Playdoh Digger

	Start off by creating a small block of yellow Playdoh
	Create a slightly smaller block
	Create a blue upside-down Y shaped prism
	Put the three pieces together and create a yellow square
	Fit the yellow square on top of the blue prism

	<p>Create a dark blue circle and attach it to the side of the smaller yellow block</p>
	<p>Create 3 other dark blue circles and add them to the sides of the other blocks</p>
	<p>Create a yellow digger arm and attach it to the top of the smaller yellow block</p>
	<p>Create 2 yellow pillars and fit them either side of the light blue prism Add smaller grey disks in the middle of each wheel</p>
	<p>Split the pillars down middle and bend them over the wheels</p>
	<p>Create a thin black line round the top of the light blue prism underneath the yellow square</p>

	<p>Twist up some black and grey Playdoh and insert it into the wheel arches Add two yellow wedges on top of the yellow square and yellow circles to the tops of the wheel arches</p>
	<p>Add a 5 finger grey grille to the front of the big block</p>
	<p>Add 2 white semi-circles with black dots in to the front of the light blue block to create eyes Add 3 small grey circles to the bottom of the grille</p>
	<p>Create a small grey pillar with 2 divots pushed into it, and fit it on the right side of the digger</p>
	<p>Well done you've now completed the Playdoh digger!!</p>
